INFORMATION SHEET

Pilot license third country CONVERSION - medical part

Further to your request for the conversion of a pilot's license from a third country, it is prescribed that the EU pilot's license must be accompanied by the corresponding EU medical certificate.

So, if you already have or have had a medical certificate issued by an EU member state, you are required to submit a request form for the transfer of medical documentation: MED-FRM-008 Form for the transfer of aero-medical records — for the purpose of change of state of licence issue (AERO-MEDICAL SOLI FORM). You can find the form at the bottom of the website https://www.ccaa.hr/en/forms-72237.

If you have not had an EU medical certificate or it has expired for more than 5 years, you must undergo an initial medical examination for an EU medical certificate of the class that corresponds to your pilot's license. The initial examination for class 1 must be done at an EU Aero-medical Centre (AeMC). A list of Croatian AeMCs can be found on the website https://www.ccaa.hr/en/aero-medical-centres-and-examiners-aemcs-68747.

The initial medical examination can also be performed in another EU member state. Still, you must indicate that Croatia will be the country of pilot licence issue, so that AeMC will send your medical documentation to us, i.e. the CCAA medical assessor who will confirm compliance of your medical certificate during the pilot licence issuance process.

Remark

Sometimes the transfer process, i.e. the exchange of data between the competent authorities, takes longer, so if this is your case, be patient.

On the other hand, additional tests or consultations may be requested during the initial examination, so do not wait until the last minute before the skills test or immediately before the issuance of the license to perform it. Make an appointment for a medical examination on time.
